leonardo muñoz

I'm a developer based in wonderful Mexico City. I create web apps with a focus on a smooth user experience and implementation of best coding practices. I'm constantly learning new technologies to stay relevant and bring the best of engineering and innovation together.

💼 WORK EXPERIENCE

Oct 2018 | Today

Angular developer
Globant Mexico / Sourceability
- Improved user experience by redesigning widgets to be interactive and facilitate the user to manipulate data and rearrange layouts.
- Reduced app's initial loading time by better bootstrapping Angular and better managing DOM manipulation.
- Followed Scrum methodology.

Sept 2017 | Oct 2018

Javascript developer
Globant Mexico / ZapLabs
- Developed web tools to consolidate the administration of the brand's subsidiaries' blogs under a single site.
- Developed new features for blogs using plain Javascript and ES6.
- Followed Kanban methodology.

Sept 2016 | Aug 2017

React developer
Globant Mexico / DWA Nova
- Developed a cross-platform desktop app for managing Adobe Photoshop and Illustrator assets using frontend technologies.
- Created desktop app with React + Redux and Electron, and Adobe plugin with HTML/Javascript.
- Integrated with Node server for local file storage through sockets with WebSockets and socket.io.
- Unit tests done with Mocha, Chai, Sinon and Enzyme.

Nov 2015 | Sept 2016

AngularJS Developer
Globant Mexico / United Airlines
- Developed a control panel to administrate personnel and daily tasks using AngularJS, ES6 and SASS.
- Created widgets with a focus on reusability to share components among projects.
- Automated tasks to build environment and scaffold components using Webpack and Gulp scripts.
- Followed Scrum methodology.

Aug 2015 | Nov 2015

.NET Developer
Indigo Smart Software Development
- Designed and created an API for processing payments in an e-commerce application using .NET.
- Maintenance of existing RESTful web services of a flight ticket booking application.

Jun 2014 | Jul 2015

Full Stack developer
UNAM - SPF
- Developed an app for payment services in a government agency.
- Created UI following an MVVM pattern with KnockoutJS, Lodash and HTML5.
- Implemented digital signature process for documents using .NET Crypto API.

2014 | 2015

Instructor
KMMX
- Taught courses about HTML5 APIs and features, AJAX with PHP and Java Fundamentals to students ranging from beginners to IT specialists.

🎓 EDUCATION

May | Nov 2015

Diplomate Course
National Autonomous University of Mexico (UNAM)
Embedded Linux

2007 | 2013

B.S. in Electrical & Electronics Engineering
National Autonomous University of Mexico (UNAM)
